This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

INTRODUCTION.

City Clerk's Office,
Fitchburg, Mass., October 9, 1899.

This volume contains an exact transcript of the Old Records of the Town of Fitchburgh from February 9, 1789, to April 18, 1796, besides a record of all the vital statistics contained in Volume I. and so much of Volume II. as is contained in pages 0 to 303 inclusive, being the original records prepared by Thomas Cowdin, Phinehas Hartwell and Joseph Fox, town clerks, with such additional records as were made to the family records by later clerks.

In these older records each family was given two full pages, the right hand page being used to record the births, and the left hand page the deaths. To give our readers an idea of the pages in Volume II., I had Mr. J. C. Moulton photograph some of the pages, from which plates were made by the Heliotype Printing Company of Boston, Mass.

The printer's copy was prepared by Mrs. Fannie B. Davis and Miss Bessie J. Davis.

The work of printing has been executed by the Sentinel Printing Company in their usual careful manner, and the index has been prepared under the supervision of Mr. Frank C. Hoyt, foreman of that company.

The same general method has been used in this volume as in former volumes with reference to paging, the heavy figures enclosed in brackets representing the paging in the original books.

We hope the perusal of this book will be found to be of service to those interested in genealogical matters, as well as to those persons who are interested in acquainting themselves with the methods pursued by our forefathers in the transaction of town business.
